Kids Surveillance

If Parent Picks and Drops Student

If Parent sent other person to Picks Student an alert will be sent to parent

If Authentication failed an alert will be sent to police

Child trafficking is an issue that is extremely prevalent in India, and is continuing to grow rapidly. The trafficking of young girls(under the age of 18) has grown 14 times over the last decade and 40,000 children are abducted each year, leaving 11,000 untraced according to the National Crime Record Bureau (NCRB).

We are here with a solution to reduce those kidnaps happening to the students near school. By using Image processing and analytics we can alert parents in the form of message when a stranger arrives school to pickup the child, then they either agree to handover their child to that person or can raise a complaint against him if he is suspected.
